Attention:

25X1

25X1

Thank you for your letter of May 14th in which you request that we forward to you, brochures describing Chase Protex bags.

We do not have printed literature available describing this material but are glad to supply you with the basic information about it.

The word PROTEX is our trade name for burlap or cotton to which 30-lb. ream basis Crinkled Kraft paper has been laminated with one of several laminating agents.

While we are in a position to supply various weights of Crinkled Kraft, we have found that the weight having widest commercial acceptance is a 30-lb. basis ream weight.

Likewise, we use a variety of laminating agents, including asphalt, latex and vegetable adhesives.

These lined and combined materials are manufactured into bags, tubes, sheets and of course, are available in roll stock.

The following is a list of the several variations which we manufacture:

**CONSTRUCTION OF LINED AND COMBINED MATERIALS
